Crypto: TRNG(ClientRunsOnCM4)

› **Description**:
  − This example is used to demonstrate decrypt and encrypt of TRNG. Generate true random number, and result can be check from result array.

› **Target Device**:
  − Traveo-II CYT2Bx devices

› **CPU Board**:
  − CYTVII-B-E-176-CPU BOARD REV.C (REV_C)

Crypto: TRNG(ClientRunsOnCM4)

› **Dependency:**
  – None

› **Expectation**:
  – Generate psued random number, and result can be check from result array.

Trigger MUX: DMA-UART

› **Legend**:
  – Red block for power, debug and USB (Mandatory)
